ETL: add a history row for item 17
item version 0 → 1
commit
(a) Check, then run, in two transactions
check item key unique
one row per item
run SQL, sees new row
counts item 17 twice
(b) MAVRA: one read-only snapshot
4
read version
item 0
reuse outcome
for item 0
not visible
run SQL at item 0
counts each item once
time
