5 (a) Share checks after a write

7 checks, 15 refs

	Condition	SR	RA	RR	ER	item	sales
1	store_sales.K	●		●	●		●
2	item.i_item_sk				●	● ×	
3	store_sales → item				●	●	●
4	date_dim.d_date_sk	●	●	●	●		
5	store_sales → date	●		●	●		●
6	store_returns.K_r		●	●			
7	store_returns → date		●				
	New checks / full checks per definition:					**2 / 5**	**3 / 12**

Blue: shared references; teal: checks run once for all agents.

6 (b) Repair: prune, verify, then require a unique edit

Index probe on ΔT: key 17 → duplicate

1,001 rows; 1,000 keys

Filters (≤ 20 values)

i_is_current:

'Y': 1,000 rows → keep

'N': 1 row → prune

category: 200-201; prune

Pruning only; not admission.

A candidate must pass BOTH

1. All $C(x \oplus e)$ hold on current D
2. Replay the source answer from E_x

2,754,299.60 = source ✓

Key uniqueness alone is insufficient.

Exactly 1 passes → publish $r+1$: i_is_current='Y'

0 or > 1 pass: retire; domain check fails: pending
